

# BLUESOURCE ARCHIVING AND JOURNALING SOLUTIONS

Powered by Veritas Enterprise Vault Suite

Protect  
Govern  
Move  
Manage

As data volumes and compliance needs rise the storage of unstructured data has become more challenging. Discovery and storage costs in particular can increase exponentially unless data is captured, stored and made easily discoverable in a consistent way.

bluesource Archiving, Journaling and ediscovery services powered by the best of breed Veritas Enterprise Vault Suite provides a significant range of benefits to organisations who are using the base EV functionality.

## AN OVERVIEW OF ENTERPRISE VAULT SUITE FOR YOUR BUSINESS

The foundation for your information governance strategy:

Classification

Supervision

Records management

File governance

Archiving agents

Discovery

While individual Enterprise Vault modules may still be licensed individually, you can now acquire access to all native features and modules in a single, comprehensive software-bundle Enterprise Vault Suite (licensed per user or via subscription).

## ENTERPRISE VAULT SUITE FEATURES

### Archiving Agents

- ✓ Mailbox archiving for Microsoft Exchange Server
- ✓ File archiving from Windows, NetApp, Isilon and other Common Internet File Systems
- ✓ Archiving for Microsoft SharePoint
- ✓ Image Archiving via OCR to enable search and retrieval of archived images

## BENEFITS

- ✓ Improve predictability over application storage levels
- ✓ Achieve and maintain regulatory compliance
- ✓ Reduce the long-term retention of unstructured data
- ✓ Gain access to all native features and modules included in Enterprise Vault Suite
- ✓ Apply automation to store what you need

## GET IN TOUCH

We help organisations protect, govern, move & manage their data.

## Classification

- ✓ Classification of all content archived by Enterprise Vault to help improve retention management, eDiscovery and supervision
- ✓ Reclassify entire archive or individual archived items to help reduce overall storage, add granular retention, and meet evolving information retention policies or regulations
- ✓ Verification through Gated Deletion to re-test expiring items in case policies have changed

## Records Management

- ✓ Utilise classification to categorize and tag archived items as Permanent or Temporary
- ✓ Store permanent records on premises and move temporary records to cloud storage efficiently
- ✓ Export Permanent records in a NARA compatible format for long-term preservation at the National Archives

## Discovery

- ✓ Captures all sent and received email, independent of user deletions, through journal archiving from supported mail sources and indexes archived email at the content level for search
- ✓ Includes Veritas Enterprise Vault™ Discovery Accelerator, offering an eDiscovery case management workflow with chain-of-custody tracking
- ✓ Integrates with classification to streamline eDiscovery processes through enhanced search precision

## Supervision

- ✓ Captures all sent and received email, independent of user deletions, through journal archiving from supported mail sources and indexes archived email at the content level for sampling and monitoring
- ✓ Includes Veritas Enterprise Vault™ Compliance Accelerator, offering a supervision workflow to help demonstrate your commitment to compliance and best-practice governance
- ✓ Integrates with classification and supports learning from previous user behaviour to help reduce reviewer workload

## File Governance

- ✓ Archives Windows-based file servers to help improve storage predictability and governance over unstructured data.
- ✓ Includes Veritas™ Data Insight, offering file reporting, analytics and visualization, as well as integration that supports archiving files from Data Insight reports directly to Enterprise Vault

## TO FIND OUT MORE

At bluesource we can help to define your continued use of Enterprise Vault through workshops and data assessments whilst providing ongoing support to help you optimise your use of the EV Suite. Speak to us today.
