CURRENT STATE ASSESSMENT

With all the different public cloud services available today, it is little wonder that many organisations struggle with where to start when considering moving to the cloud. Organisations need to be certain that their data is secure and compliant when making the move to cloud based services.

This is where our cloud service offerings comes in.

Cloud Strategy Envisioning

Current State Assessment

Azure Launch

CURRENT STATE ASSESSMENT

CHALLENGES

√ Standing up expensive resources is all too easy

√ Resource sprawl is often experienced as platform owners are unfamiliar with the nuances of public cloud services management

√ Unsecured resources can introduce significant risk to the business and its data

THE BLUESOURCE APPROACH

The bluesource approach is to conduct a current state assessment discovery and review of the existing Microsoft Azure cloud environment to understand current configuration, security controls and governance controls in place. The output of the engagement is an assessment report to discuss recommended remediation to realise best and proven practices along with cost savings that could be made to the current usage and configuration.

BENEFITS

√ Gain an understanding of how the existing cloud platform is configured against best and proven practices

√ Understand potential security concerns with the current configuration

√ Understand the potential cost savings that could be realised through resource configuration optimisations

√ Receive an assessment report discussing the recommended remediations to ensure good cloud services practices to remain secure and compliant

GET IN TOUCH

We help organisations protect, govern, move & manage their data.
