DISASTER RECOVERY AS A SERVICE (DRaaS)

bluesource

**Protect
Govern
Move
Manage**

Use our DRaaS solution to immediately respond to worst case scenarios and protect your data from downtime.

bluesource's Disaster Recovery as a Service (DRaaS) gives you more ways to protect critical workloads with a consistent and continuous Disaster Recovery (DR) process. Our intuitive Cloud-based portal enables you to test DR with zero impact on your production systems and leverage leading Cloud providers including Microsoft Azure and Amazon Web Services (AWS).

From a single console, you gain complete control over all your sites and can easily recover from ransomware, corruption or any other disaster. Our team of experienced engineers are available 24/7 to support live invocations, scheduled tests or general enquires.

UK-BASED TIER 3 DATA CENTRES
• London
• Maidenhead
• Manchester
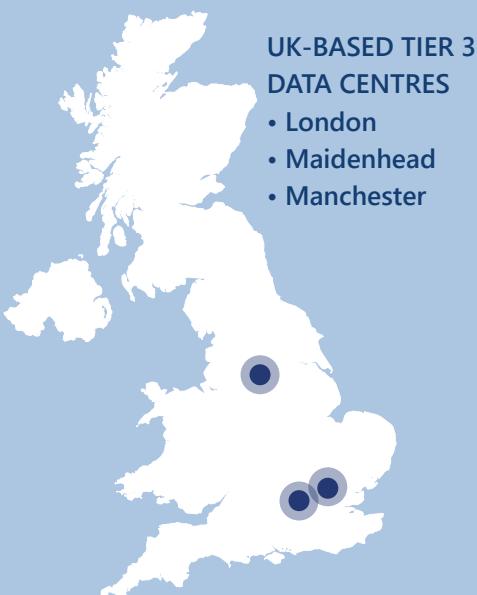

Our DRaaS solution, powered by Zerto, helps you protect your business against worst case scenarios. Our purpose built solution enables you to leverage UK-based Data Centres and leading Public Cloud providers including Azure and AWS to minimise risk and get you back up and running.

Microsoft Azure   amazon web services™   Zerto

FEATURES

Service Agility
The fully managed service offers multiple tiers of service and functionality

Ease of Management
Single unified interface for management of data policies and reporting

24/7 Proactive Service Management
Enabling you to prioritise and focus on non-DR related priorities

Leading Service Methodology & Execution
Backed by ITIL process and ISO27001 certification

Concise reporting
Enabling security for you in completion and ownership of Data Protection

Strict SLAs
Proactive management platform with stringent SLAs (with penalties)

BENEFITS

No Capital Investment for 'Just in Case' Scenarios
No provisioning of a second site, standing up infrastructure, deploying software or additional headcount – Giving engineers their weekends back

Simplified Testing
One click failover testing and failback at any time of day with our consultants available to assist

DR Reporting/Compliance
Detailed service level reporting or DR testing for executive management and governance

No Impact DR Testing
Zero impact testing of failover processes

Granular Data Consistency
Adherence to aggressive RTO/RPO requirements

Superb Service Levels
RPOs measured in seconds and RTOs measured in minutes – guaranteed SLA of 4 hours

Built-In Failback Functionality
Simple post-DR return to business as usual helps you get back to normal after a disaster

Flexible Topology Configuration
Single source, multiple destinations

Ransomware Protection
Point in time recovery to consistent pre-attack points

Application Consistency
Maintain application integrity across all application components

WHY CHOOSE US

√ **Reliable 'as a Service' Model**
Our simple DRaaS model enables you to reduce your cost drastically and benefit from a predictable monthly service

√ **Fully Customised**
We offer one-click recovery and boot order specification that's tailored for your specific business needs

√ **Experts in Data Recovery**
Our team of engineers are leaders in their field and are onhand 24/7 to support you with full training on the Cloud portal

√ **A Range of Options**
We give you more options for Disaster Recovery from Data Centres to Public Cloud, so you can find the one that's right for you

√ **Powered by Zerto**
Zerto Virtual Replication is the industry's first hypervisor-based replication solution for tier-one applications, replacing traditional array-based BC/DR solutions
