IMPROVE THE SPEED AND COST OF dSARS WITH THE BLUESOURCE eDISCOVERY SERVICE

Powerd by Veritas

**Protect
Govern
Move
Manage**

Data Subject Access requests can be a real challenge for businesses who suffer from multiple legacy systems, data repositories and sub-standard data discovery tools. The result can be missed response times and high costs associated with multiple searches from different systems.

bluesource uses best of breed vendors to solve a variety of data management problems for customers and we have built a range of eDiscovery services on the leading platform from Veritas.
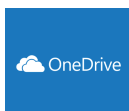

The platform is the foundation for streamlining your searches for relevant documents across a wide range of file types including:

email   Microsoft SharePoint   Microsoft OneDrive

Search results delivered are reliably accurate, repeatable and efficient – ensuring that your legal privacy team can comply quickly and fully with all privacy related data requests you receive.

AN OVERVIEW OF THE eDISCOVERY PLATFORM

Defensible Data Discovery with Integrated Data Classification

√ Complete integration with the Veritas Classification Engine by delivering powerful intelligence into data risks on-premises and in the cloud

√ Quickly scan and tag data, using a pre-designed set of classifications

√ Prioritise review efforts by stack ranking the items that are most relevant to analyse

Expediently Review and Redact Data to Meet Stringent Timelines

√ Use the powerful set of review and redaction tools that allow for smarter and faster data analysis

√ Bulk Redaction automatically combs through a data set and masks all sensitive data

√ Enable your users to demonstrate to individuals why particular data items were withheld

√ Data annotation capabilities that simplify how case handler's mark-up review documents

bluesource eDiscovery services are available as:

√ a fully managed service on-premise

√ a reactive service that complements your compliance process

√ a fully managed deployed service in the cloud

Speak to us today about your current process capability and find out how we can help.

BEST OF BREED TECHNOLOGY

√ Consistently address dSARS quickly, easily and reliably

√ More manageable searches of your company data

√ Quickly pinpoint personal data and review it to assess whether it should be disclosed

√ See powerful intelligence into data risks on-premises and in the cloud

√ Rank data items that are most relevant to analyse
