

THE BLUESOURCE SUPPORT SERVICE

Always there when you need expert guidance, bluesource support becomes the extension of your in-house team, adding the capabilities of the UK's leading messaging, communication and collaboration specialist to your own. We are fully staffed by accredited technical analysts to provide 24x7 coverage because we know how important it is that you are always in capable hands.

bluesource offers a range of different support services to fit our customer's requirements. Below is a breakdown of our reactive and proactive support models and their associated deliverables.

REMOTE ASSIST

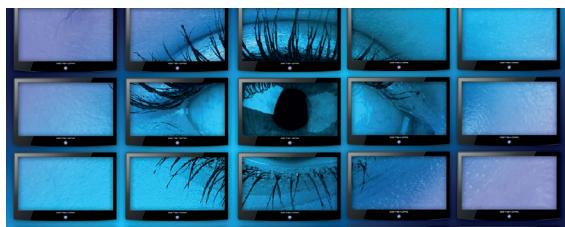

For organisations that are looking to continue supporting their own environment but wish to call upon the experts if an issue arises which lies outside of their comfort zone. We offer a flexible ticket-based reactive third line telephone support service, designed to provide a low-cost safety net.

REACTIVE APPLICATION MANAGEMENT

We offer a reactive application support service specifically for your core applications. By leveraging our in-house expertise, you can resolve issues that you are unable to resolve by yourself. This is a third line application specific support contract service.

MONITORING

Our monitoring service provides detailed intelligence across a range of infrastructure and workloads, allowing you make informed decisions. We offer 24/7 monitoring of your environment with notification of filtered alerts to a relevant member of your team.

MONITORING AND MANAGEMENT

Wrap our Managed Service around your critical business infrastructure, on-premises, in Azure or Hybrid. You can keep pace with change and retain control over what really matters; supporting end users, internal projects, customers and suppliers.
