

# ENTERPRISE VAULT

## Version Comparison

### Why You Should Upgrade to Enterprise Vault 14

View our version comparison chart to compare a recent version of Enterprise Vault with 14 to see what other features you're missing out on.

| Features   | 12.0      | 12.5      | 14.0      | Feature Notes  |
|--|-----------|-----------|-----------|--|
| Release Date   | Feb. 2016 | Oct. 2019 | Nov. 2020 | Added support for new workloads.   |
| <b>Cloud &amp; Platform Support</b>                                |           |           |           |  |
| Flexible deployment options  | ✓         | ✓         | ✓         | Deploy on-premises, to the cloud (AWS or Azure) or as a hybrid model that meets your needs.  |
| Multiple content sources   | ✓         | ✓         | ✓         | Search, preserve and review multiple enterprise content sources from a single vendor.  |
| Optical Character Recognition (OCR) image conversion (new in 12.0) | ✓         | ✓         | ✓         | Ability to recognise and index text in images stored in Enterprise Vault archives; search for text in scanned documents, forms, faxes or screenshots after they are archived.  |
| Records Management (new in 12.1)                                   |           | ✓         | ✓         | Allows you to mark selected items such as records, conduct searches for these records and export them for transfer elsewhere. Fulfils the requirements of Capstone (U.S. government standard).   |
| OCR conversion enhancements (new in 12.2)                          |           | ✓         | ✓         | Extends the OCR functionality to convert images in PDF files, Microsoft Office documents and other file types.   |
| Native Google G Suite support                                      |           | ✓         | ✓         | Configure G Suite to send journal emails to the Enterprise Vault SMTP server.  |
| AWS Cloud storage with native services                             |           |           | ✓         | Support for AWS Cloud native services: <ul style="list-style-type: none"> <li>S3 as primary storage</li> <li>KMS encryption</li> <li>IAM role</li> <li>AWS GovCloud</li> </ul>   |
| Azure Cloud storage with Native Services                           |           |           | ✓         | Support for Azure Cloud native services: <ul style="list-style-type: none"> <li>Blob as primary storage</li> <li>Azure GovCloud</li> </ul>   |
| <b>Compliance &amp; Supervision</b>                                |           |           |           |  |
| Classification   | ✓         | ✓         | ✓         | A framework that allows for automatic classification, metadata tagging and records identification, facilitating search, discovery and other activities.  |
| Veritas Information Classifier support (new in 12.2)               |           | ✓         | ✓         | Support for our next-gen classification engine with hundreds of built-in policies and patterns to help make informed decisions around retention period, storage tier, discovery and supervision.   |
| Classification enhancements: PII                                   |           | ✓         | ✓         | New policies for CCPA and personal data detection for Brazil, Croatia, Iceland, Russia, South Africa and Ukraine.  |
| Classification enhancements: PII                                   |           |           | ✓         | New policies for personal data detection for China, India and Hong Kong.   |
| Classification enhancements: COVID-19 and ransomware policies      |           |           | ✓         | New classification policies for helping users tag COVID-related and ransomware content.  |
| Hotword analysis   |           | ✓         | ✓         | <ul style="list-style-type: none"> <li>Filter items based on existing hotwords and hotword sets.</li> <li>View count of hotwords found in each item.</li> <li>View hotword statistics found in the selected item, including the count of the hotword based on the location.</li> </ul> |

| Features                               | 12.0 | 12.5 | 14.0 | Feature Notes   |
|--|------|------|------|---|
| <b>Compliance &amp; Supervision</b>    |      |      |      |   |
| Escalation Review enhancements         |      | ✓    | ✓    | Reviewers must add a mandatory comment before escalating any message, providing context about the reason for the escalation.  |
| Department hierarchy view              |      | ✓    | ✓    | You can now view the list of departments, subdepartments and research folders in the correct hierarchy rather than as a flat list.                                      |
| Advanced Supervision                   |      |      | ✓    | A new, full-featured Veritas Advanced Supervision solution offered on both Enterprise Vault and Enterprise Vault.cloud.   |
| <b>Discovery</b>                       |      |      |      |   |
| Legal Holds                            | ✓    | ✓    | ✓    | Search, preserve and initiate legal holds on archived data.   |
| Restricted Searches                    |      | ✓    | ✓    | In Discovery Accelerator, you can now restrict searches to access information specific to the departments in the Compliance Accelerator.                                |
| Export to PST enhancements             |      |      | ✓    | Conversion of EML to MSG.   |
| <b>Usability &amp; Reporting</b>       |      |      |      |   |
| Enhanced Search (new in 12.0)          | ✓    | ✓    | ✓    | Several new enhancements that improve search capabilities, including search suggestions (based on previous searches), a "Recents" list and a customisable results pane. |
| Analytics Connector (new in 12.2)      |      | ✓    | ✓    | Provides third-party applications with Enterprise Vault index metadata, useful for analytics and machine learning applications.   |
| New OData reports                      |      | ✓    | ✓    | New reports show the count of items based on the classification policy applied and information on hotword statistics for items that were flagged by hotword hits.       |
| Custom message types                   |      | ✓    | ✓    | Search for, export and create reports for items based on selected message types.  |
| Hit highlighting navigation            |      | ✓    | ✓    | Navigate between highlighted search terms within an item. In case of multiple search keywords, you can choose keyword you want highlight and navigate on.               |
| Time-based searches                    |      | ✓    | ✓    | The Date range section now includes time controls in the From and To fields that allow you to specify the time along with the date to further refine the search.        |
| Search Classification Tags             |      | ✓    | ✓    | In addition to selecting a tag value from the drop down, you can now type in the tag value to perform a search.   |
| SMTP Server Certificate settings       |      | ✓    | ✓    | Configure connection security settings at the SMTP server-level that override the site-level settings.  |
| Power BI Templates for OData reports   |      | ✓    | ✓    | New Power BI Templates you can use to connect to the OData web services and generate detailed reports.  |
| Advanced Supervision: web-based client |      |      | ✓    | Veritas Advanced Supervision will offer a new web-based client combining the best of AdvisorMail and Compliance Accelerator functionality.                              |
